

PMAB Technology

Technology{flv}clip_09{/flv}Press PlayTechnology. PMAB's strength has been, and will continue to be, our use of the latest, most sophisticated technology in the industry. Our innovative applications give our clients powerful, successful tools. PMAB's success can be attributed to technology. The ability to transpose information into meaningful information is a powerful tool! We understand our Client's needs, reduce A/R days, increase cash flow, and minimize debtor reaction while maintaining profitability and controlling costs. PMAB's solution is technology! By scoring, analyzing, and benchmarking our Client's A/R, we have imposed a more efficient means in collecting a receivable. Precision.BI. Precision.BI is a desktop solution that can assist our Clients by offering a data repository, consolidating multiple system platforms, and allowing data manipulation. Precision.BI is highly integrated software that uses the growing mass of data about patients, financial workflow, and payers—such as basic account information, visit history, payment history, productivity, denials, reimbursements, etc.—and exploits it to uncover additional revenue opportunities, areas for savings and efficiency, and operational trends. Summary key performance indicators are presented automatically through its Performance Dashboard, and detailed drill-down views are available in real-time. Precision.BI promises to be the benchmark against which other healthcare BI systems are measured. Precision.BI, our analytical tool set, will:

- Provide Powerful and Accessible Analysis for All Users
 - Get the Right Information, to the Right People, at the Right Time
 - Leverage your Existing Software Investments
 - Have Meaningful Information Come to You Proactively
 - Provide Result-Oriented Analysis Delivered Where and When You Need It Most
 - Embed Data Intelligence Throughout the Healthcare Enterprise
 - Employ Intuitive and Easy-to-Use Querying and Reporting
 - Create Partitions by User or Groups of Users with Powerful Security
 - Enable Open and Scalable Architecture Allows Linking to Other Applications
 - Provide Drill Through to Multiple Levels of Data to Obtain Detailed Results
 - Enable You to Expand the Toolset To Other Departments
