

## The MBOC Process

At MBOC we make it as simple a process as possible for you so we can get what we need to analyse your current business process pertaining to the revenue cycle. Below is a sample of what we will do.

- Provide data sheet to be completed and returned prior to on-site interview.
- Conduct on-site interviews after normal hours of operation and on Saturdays. Limited on-site time required depending on the size of the practice ( between four to sixteen hours)
- Analyze interview notes and data provided.
- Create draft assessment document including implementation plan for recommended changes.
- Review assessment document with appropriate leadership.
- Revise assessment and implementation plan for final document.
- Presentation to appropriate practice/group representatives.

We advocate YOU conducting your implementation plan. This reduces your cost and creates ownership of the process by you and your staff.
